- *Eliminates streaks and swales from silk and other light weight garments*
- *Ready to use, no mixing required*
- *Contact us for pricing and available sizes*

DIRECTIONS

When removing silk and other fine garments from the dry-cleaning machine, determine which garments will require treatment. Immerse the garment in ChemBrite Silk Luster[®] that has been placed in a clean covered container. After 30-60 seconds, remove the garment and place in the dry-cleaning machine. Repeat the above procedure with the remaining garments. When all garments have been placed in the dry-cleaning machine, extract gently and cool dry.
