

Silk Spotter

For Water-Sensitive Fabrics

“ChemBrite Silk Spotter”

The hi-tech choice for pre-spotting water sensitive fine fabrics. Ready for use and effective on nearly all unset stains. Balanced as a leveling agent to minimize graying (redeposition), rings, shrinkage and the need to dry before drycleaning. The proven alternative to wet-side spotting. Eliminate guesswork and mistakes. Compatible with perchloroethylene and hydrocarbon systems.

- *Designed for pre-spotting silks and other water sensitive fabrics*
- *Can be used in perchloroethylene and hydrocarbon systems*
- *Excellent for silks, rayons, polyesters, and blends*
- *Functions as a quality leveling agent*
- *Contact us for pricing and available sizes*

DIRECTIONS

Use product as supplied, no dilutions are necessary. Apply generously to the stain and gently work the stained area until the stain is removed. Do not allow the garment to dry. Place garment in the drycleaning machine and run through the normal drycleaning cycle.
