

“ChemBrite Spray Spotter”

An aqueous base nonionic/ anionic blend fatty acid-free spot, soil and stain remover, and is mainly for use in spray apparatus, but can also be used to increase effectiveness in a dry-cleaning operation. This product has penetrating action that loosens soil and stains from garment.

- *Pre-spotter for spray application*
- *Saves time and improves cleaning effectiveness*
- *Use in batch operation for hard to clean loads*
- *Apply to wet-spotted areas to eliminate ring formation*
- *Safe on delicate fabrics*
- *Contact us for pricing and available sizes*

DIRECTIONS

For spray tanks, mix one part ChemBrite Spray Spotter[®] with four parts water. For hard to clean, heavily soiled loads, clean right in the wheel by running 3 minutes on filter, then add 2 oz. of water with 2 oz. of ChemBrite Spray Spotter[®] for every 10 pounds of garments. Next, batch run 5 minutes off filter, then 3 minutes on filter. Boost strength of regular dry-cleaning detergent by adding 2 oz. of ChemBrite Spray Spotter[®] per 10 pounds of garments.
