

*Injectable or Charge Sizing*

## **“ChemSize”**

Product is a liquid sizing that will restore garments to their original crispness, as well as provide added hand and body. Product will help to improve finishing time, and qualities. Product can be injected, or used as a charge system.

- *Reduces wrinkling, and improves finishing time*
- *Restores body, feel, and drape to garments*
- *Formulated for use with perchloroethylene or hydrocarbon solvent*
- *Compatible with charge or injection detergents*
- *Contact us for pricing and available sizes*

### **DIRECTIONS**

Add ChemSize<sup>®</sup> to final cleaning cycle at 1 ounce per 10 pounds of garments. Run on batch for 3 minutes. For heavier body and feel, increase the concentration of ChemSize<sup>®</sup> to 1-1/2 ounce per 10 pounds and run for 5 minutes. Can be run as charge by adding 13 ounces of ChemSize<sup>®</sup> per 10 gallons of solvent.
